TURNKEY SOLUTIONS FOR SUCCESS

Like any business, operating a range can be extremely demanding. We are aware of the unique challenges that come with range ownership and have spent decades developing products and services that simplify the process for range owners. From target retrievers, bullet traps, and stalls to ventilation, security, and range lighting, Action Target engineers solutions that ensure the success of our range partners. Furthermore, our services team is structured to provide industry-leading support and preventative maintenance to keep ranges up and running at peak performance. When range owners decide to build or expand a range, we guarantee they won't need to look any further than Action Target.

RANGE MANAGEMENT SYSTEMS
Expand the functionality of your range control

SMARTRANGE AXIS™
ENHANCED RANGE CENTRAL CONTROLS

SmartRange AXIS™ is a powerful range management platform that delivers remote access for rapid diagnosis and service, an integrated control console that puts all equipment at your fingertips, and an intuitive interface for staff and customers. It adds secure wireless operation with administrative logins, robust lane management, industrial-grade tablets, and multi-tablet control options—maximizing lane utilization and user experience.

Lane Management
SmartRange AXIS Lane Management is second to none, offering the ability to enter shooters' names, assign unique permissions, and designate lane time limits.

Unique Permissions
User profiles are created by ranges and assigned to shooters at check-in. Each user profile carries unique permissions for program access and editing, lighting control, and equipment features. This allows ranges to tailor each session based on criteria such as range staff roles, membership level, etc.

Program Creation
Build dynamic programs and organize them by folder. Control exposure time, edge time, and cycle count. Or establish random parameters for a truly unpredictable and challenging training session.

Lighting Control
Control stall and target lighting from one central location for an unmatched experience in training and an enhanced look and feel for any range.

Timed Drills
Set up and execute timed drills with customized target exposure times, cycle counts, and retriever speed for training or qualification.

Action Target Connected
SmartRange AXIS uses a range server that connects with Action Target's cloud network. This provides access to analytics, remote troubleshooting, system improvements, and content updates for improved and streamlined business processes. SmartRange AXIS is your future-ready control center, designed to evolve and stay as a central element for all range operations.

HVAC Management
Utilize a user-friendly control of your HVAC system, optimizing heating, cooling, and the safe removal of smoke and harmful containments like airborne lead and carbon monoxide from your range. The system maintains the required negative pressure to other areas of your building, preventing harmful containment spread. HVAC controls also monitor filter health to keep your system running as efficiently as possible.

SMARTRANGE AXIS CONNECT™
POINT OF SALE INTEGRATION

Elevate your range's operations with SmartRange AXIS™ POS Integration. Using the SmartRange AXIS Connect Application Programming Interface (API), seamlessly link your Point of Sale (POS) system to the SmartRange AXIS platform for a unified, efficient experience. Operators gain control over lane assignments, shooter sessions, and in-stall purchasing—right from the POS—making life easier for staff and shooters alike.

Seamless Operations & Efficiency

Integrate your POS* with SmartRange AXIS Connect™ to streamline workflows, cut errors, and free up staff to focus on what matters: exceptional customer service.

- **Lane Assignments**: Assign lanes quickly and accurately.
- **Session Tracking**: Monitor shooter sessions in real time.
- **Shooter Permissions**: Set access levels with ease.

Enhanced Experience

Turn convenience into satisfaction. Shooters can buy ammunition, targets, gun rentals, or extra lane time directly from their stall—speeding up check-ins, enabling cashless payments, and reducing wait times for a frictionless experience.

- **In-Stall Purchases**: Allow customers to make additional purchases in the shooting lane after check in.
- **Faster Service**: Keep shooters on the range, not in line.

Increased Revenue Opportunities

Maximize every visit with in-lane purchasing. Offer top-selling items and seamless lane-time extensions without shooters leaving their stalls—driving sales, boosting retention, and optimizing lane utilization.
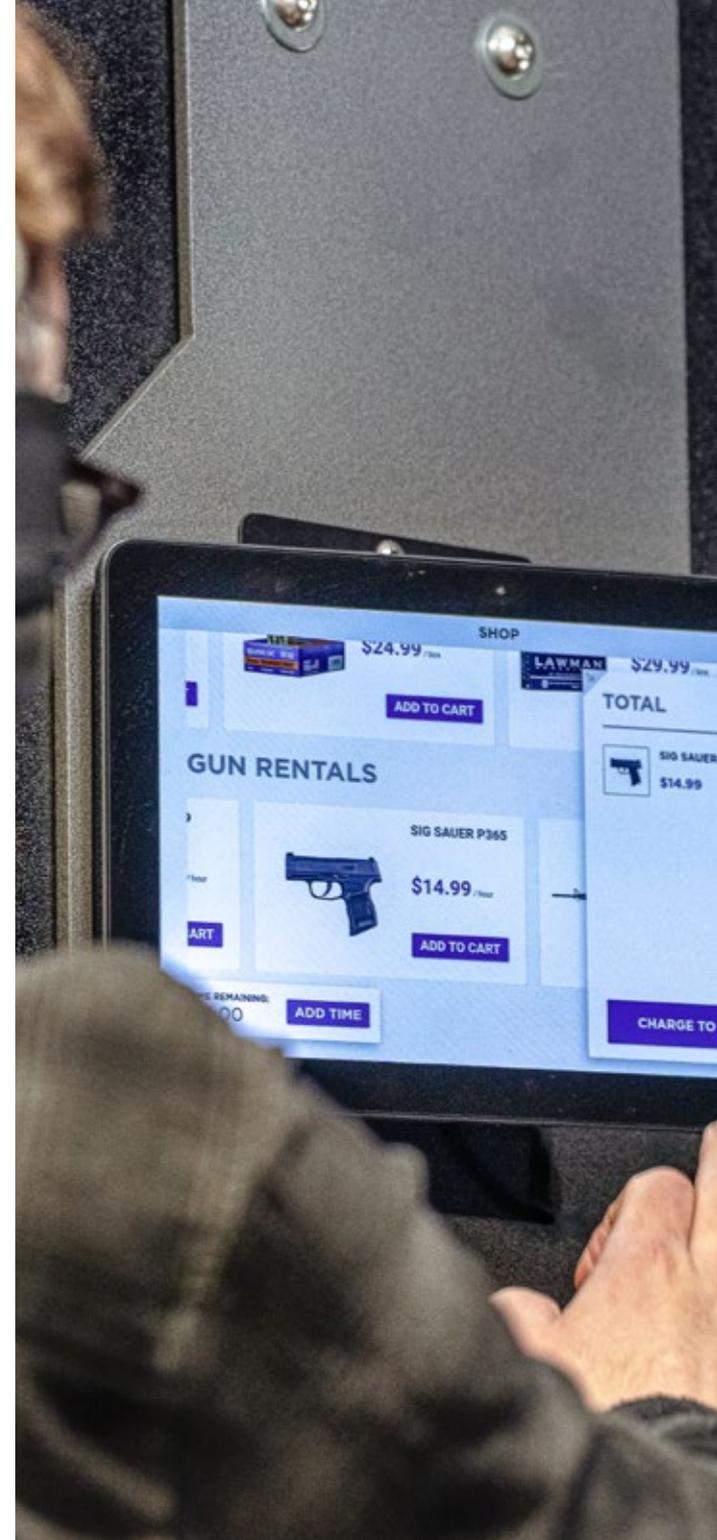

- **Upsell Made Easy**: Capture more revenue per shooter.
- **Faster Service**: Extend sessions effortlessly to increase profits

- In-stall Purchase Functionality
- Sync Lane Management with SmartRange AXIS™

SMARTRANGE AXIS CONNECT™
FLEX INTEGRATION

Take command of your entire range ecosystem, beyond Action Target products. This powerful integration tool brings third-party equipment, sensors, and systems under your control, allowing you to monitor critical inputs and create tailored, operator-defined responses. SmartRange AXIS Connect™ FLEX Integrations transform your range into a smarter, more efficient operation, all managed through the SmartRange AXIS™ platform.

Seamless Integration & Centralized Control
From a single, centralized platform, unify your range's operations with SmartRange AXIS Connect™ FLEX Integrations. Control and monitor third-party systems*—such as lighting, HVAC, sensors, and more. You can customize your range with up to 24 unique input and output connection options. Define your own setups or choose from pre-configured choices, including:

- Door monitoring Sensors
- Safety Photobeam
- Emergency stop button
- Occupancy Sensors
- Thermostat Sensor
- Range Condition lights
- Range In Use signs
- Police/Emergency Vehicle Strobe Lighting
- DCU Start/Stop and Status*
- Third party HVAC start/stop/status*
- Third Party lighting Controller*
- Auxiliary Heating Control*

LEARN MORE
ActionTarget.com/SmartRangeAXIS

Customizable Automation & Smart Triggers
Boost efficiency and safety with automation tailored to your range. Program smart responses to real-time inputs—such as occupancy sensors, emergency stop buttons, or safety photobeams—ensuring your range adapts instantly to changing conditions.

Improved Efficiency & Reduced Downtime
Minimize manual tasks and maximize uptime, enabling on-demand activation or deactivation of third-party equipment, optimizing performance and enhancing the shooter experience with automated range conditions.

Scalable Solution
Designed to grow with you, for both new and existing third-party integrations, Flex Integrations offers long-term adaptability—supporting system expansions and upgrades as your range evolves. Stay ahead with a future-ready solution under SmartRange AXIS.

*Requires integration with third-party vendor via SmartRange AXIS Connect™ Integration Panel. Capabilities may vary by product.

FEATURES

24 Unique Flex Input Hardware Connections	Universal Dry Input/Output Contacts
24 Unique Flex Outputs Hardware Connections	Ethernet Connected to Central Controller
One SRA Connect Panel per Bay	Fully Self-Contained in One NEMA Enclosure
Scalable to an Unlimited Number of Bays	Universal Power Input
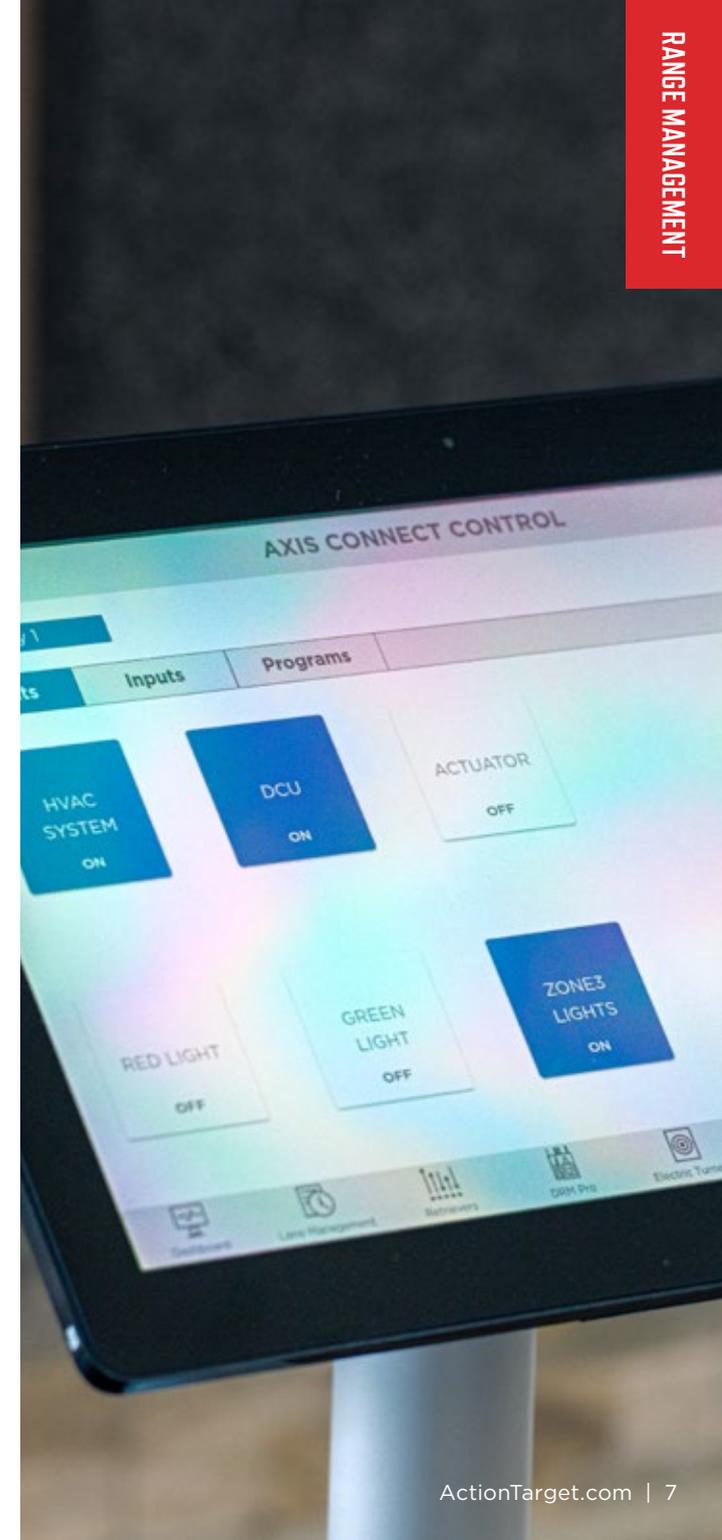

TARGET RETRIEVERS
Returning more than just targets

GENESIS™

A NEW ERA IN SHOOTING RANGE TECHNOLOGY

Smart, connected, and powerful, the Genesis target retriever is the most entertaining and engaging target retriever on the market. Genesis enables range staff to manage and train shooters, maintain their investment, and streamline range operations like never before.

Engaging Shooters
Genesis features preloaded games and drills developed by leading firearms trainers. An integrated 360° turning clamp physically exposes and conceals the target for specific or random amounts of time. This enables shooters of any skill level to be challenged.

Intuitive and Convenient
Genesis is easy to use and was designed for maximum shooter convenience. It Includes an intuitive interface, 15 ft/s travel speeds, and integrated target cameras so shooters can confirm hits without walking downrange or returning the retriever, maximizing shooting time.

Lighting
Genesis is equipped with smart accent lighting to communicate visually with range staff, offering a preferred accent light color to denote normal operation or misuse. Integrated dock and retriever lights provide key lighting with white light for enhanced visualization or police strobes to create real-life training scenarios.

Action Target Connected
Genesis is connected to SmartRange AXIS™ range control software through Action Target's cloud network. This allows Action Target to update content remotely, troubleshoot on the fly, and provide expedited customer support.

Strike Watch™ Technology
Genesis incorporates Strike Watch technology to detect bullet strikes to the carrier, protecting your investment. If the carrier is shot, the target turns to edge, all lights strobe red, and the shooter receives a warning. If there are subsequent strikes on the carrier, the session is terminated.

Hidden Clamp
The 360° turning clamp is concealed inside the carrier. This eliminates expensive and time-consuming maintenance, which is a common requirement for exposed metal downriggers. An economic 2-part backer interfaces with the clamp, enabling dynamic target presentation.

ActionTarget.com/Genesis

FEATURES

▪ Powered by SmartRange AXIS	▪ Hidden Target Clamp
▪ Color Adjustable Smart Accent Lighting	▪ Dock and Target Lighting: White & Police Strobes
▪ Strike Watch Technology	▪ Easy-to-Use Control Interface
▪ 100% Wireless Functionality	▪ Plug and Play Upgrades
▪ Integrated Target Camera	▪ 3/8" AR500 Steel Deflector Plate
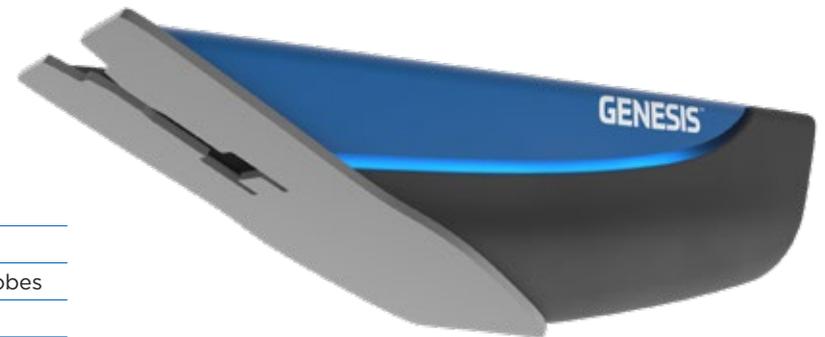

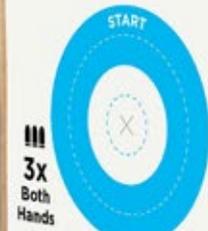

PILOT™

SIMPLE, SMART, WIRELESS

Pilot delivers the core performance ranges rely on—wireless operation, intuitive controls, and 360° turning—inside a streamlined, durable chassis. Integrated carrier lighting and target camera enhance shooter engagement and throughput, all with a low total cost of ownership.

Engaging Shooters
Pilot features preloaded drills developed by leading firearms trainers through SmartRange AXIS™. An integrated 360° turning clamp physically exposes and conceals the target for specific or random amounts of time for unmatched shoot/no-shoot scenarios. Pilot features easy setup for national, regional, and custom qualification courses, built to your specific training needs.

Streamlined Design
Pilot's wireless functionality removes cables and bus bars downrange, cutting install complexity and failure points. A hidden clamp and a front shield made from 3/8" AR500 steel protect the carrier from bullet strikes. Fewer breakages mean fewer service calls and a consistently low cost of ownership.

Strike Watch™ Technology
Pilot incorporates Strike Watch technology to detect strikes on the carrier, automatically protecting your investment. When shot, the shooter is flashed a warning through the control interface . After subsequent strikes on the carrier, the session is terminated.

Lighting
Pilot has integrated target lighting providing white light for enhanced target visualization or police strobes to create real-life training scenarios.

Hidden Clamp
The 360° turning clamp is concealed inside the carrier. This eliminates expensive and time-consuming maintenance, which is a common requirement for exposed metal down riggers. An economic 2-part backer interfaces with the clamp, enabling dynamic target presentation and unique training opportunities.
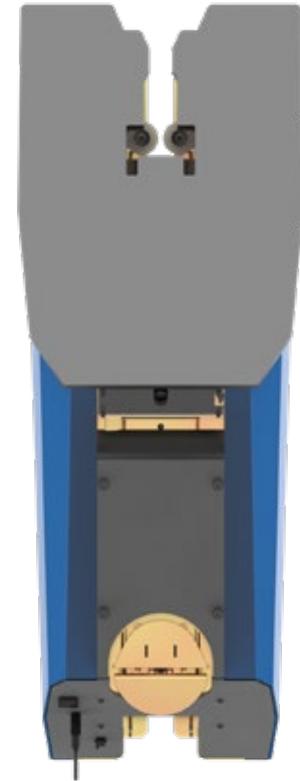

Action Target Connected
Pilot is connected to SmartRange AXIS™ range control software through Action Target's cloud network. This allows us to update content remotely, troubleshoot on the fly, and provide expedited customer support.

Outdoor Range Capable
The Pilot Xtreme's engineering allows it to operate outdoors in inclement weather above freezing temperature. Featuring IP64-rated electronics and a weather-resistant retriever/track, Pilot Xtreme is the perfect choice for ranges worldwide, even in the most remote and extreme locations.

SRET™

SIMPLE ECONOMIC RETRIEVER

The SRET target retriever is Action Target's longest standing and most economical retriever. The base SRET model is available with a simple toggle switch for out-and-back control. An optional keypad user interface may be added to provide a digital position readout.

Economical
The SRET is a simple out-and-back, cable-driven target retriever. The system's track is constructed of readily available strut. SRET's simplified design and control make it a great economical solution for ranges.

Toggle Switch Control
The base SRET model features an easy-to-use toggle switch to control target distance. Simply hold the switch to send or retrieve the target.

Keypad Control
The SRET is available with an optional keypad that displays accurate target distances.

TACTICAL SYSTEMS
Expand your training capabilities

DRM Pro™   20
AutoTargets™   22

DRM PRO™
ENHANCED TRAINING AT YOUR FINGERTIPS

The DRM Pro is a state-of-the-art running man target. Equipped with two independent target carriers, variable speeds up to 20 fps, and programmable scenarios, this system offers shooters the most realistic training available.

Fast
Targets travel at speeds up to 20 FPS for realistic training.

Powerful
Heavy-duty inductive motors and hardened pulleys are built to last in any environment.

Two in One
Dual runners on parallel tracks provide enhanced dynamic training.

Follower Function™
Train with confidence for real world situations. With Follower Function, pre-programmed drills simulate a threat holding and moving with a hostage to practice decision making and precision for moments that matter.

Smart Device Control
The DRM Pro may be controlled on any Wi-Fi enabled device and provides access to service logs for maintenance.

Smart Range AXIS™ Connected
Control your DRM Pro training targets with our integrated SmartRange AXIS platform, which seamlessly connects to give you an overall view of your range's performance and enhances your ability to manage your range. Control multiple DRM Pro's simultaneously.

Upright and Inverted Configurations
Inverted: System is installed behind the last row of ceiling baffles. Upright: System is mounted to a cement pad behind a knee wall or protective barrier.

AUTOTARGETS™

BRING A NEW EXPERIENCE TO YOUR RANGE

The dynamic capabilities of AutoTargets will draw shooters to your range. Novices and professionals will enjoy engaging these reactive targets as you challenge them with unique courses of fire, games, tournaments, and events—all automatically scored and controlled from an up-range tablet controller. AutoTargets are perfect for event nights, leagues, or advanced training classes.

Energize the Experience
Give customers an experience they will never forget, and come back wanting more. The AutoTargets™ reactive target systems add excitement and energy to commercial shooting ranges. These portable systems are perfect for competitions, training classes, event nights, or adding value to VIP programs. The AutoTargets experience is interactive for shooters and spectators and is safe for indoor and outdoor use.

Safe and Versatility
Projectiles of all sizes pass safely through the targets into the backstop without risk of ricochet or splash back.

Portable and Modular
AutoTargets can be configured in a number of different ways, allowing quick set up of numerous targets in any configuration. Lithium-ion batteries and portable air cylinders mean no tubes or wires down range. Each unit includes on-board Wi-Fi creating an independent network that works anywhere.

AutoTargets Android™ App
The free base control system for AutoTargets is available via download on Android devices. Create and save multiple courses of fire and control up to 20 target actuators. Program course details such as hits-to-fall requirements, exposure time, par times and target sequences. The app uses the device's Wi-Fi to connect to the AutoTargets mesh network and can be deployed in any environment. The app reports scoring, speed and hit data while allowing for custom configurations and ad-hoc setup.

- Users interact with a simple interface to easily determine target presentation and reaction criteria based on time delays, time limits, shot placement, and hit count.
- The app scores performance based on time and/or total shots accrued and provides immediate feedback through visual and auditory hit indicators.
- This control system is compatible with all AutoTargets lift units and target configurations.
- No existing network infrastructure is required to control AutoTargets. The App and device connect directly to the targets down range.

Powerful Wireless Control
Built in Wi-Fi automatically connects targets together in any configuration. Each unit functions as a long range sender and receiver, forming a mesh network with all connected devices out to any shootable distance.

▪ Lightweight, Portable Design	▪ Versatile Utilization	▪ Enhanced Software Option
▪ Hit-Sensing Technology	▪ Safe from Splatter or Ricochet	▪ Personal Performance Tracking
▪ Reactive Target Lifting	▪ Multiple Configurations	▪ 100% Wireless Functionality

AUTOTARGETS™ UTILIZATION
DESIGNED FOR ANY SET UP

Action Target's AutoTargets system allow you to create thrilling drills or setup an exciting game, like "whack-a-mole," that will challenge any shooter. Setting up takes no time at all and requires no modifications to your range.

AutoTargets RangeControl™ Software
Action Target's AutoTargets RangeControl Software (ARCS) is a multi-functional range automation and firearms training system designed to modernize training and competitive environments. The software controls the entire scalable ecosystem and supports training for indoor and outdoor shooting ranges. ARCS manages user data, product maintenance, target control, long-term data storage, and the complete user experience. The after action module displays and ranks shooter data in a leader board format.

Lane Control Interface
Action Target's Lane Control Technology (LCI) is an ARCS add-on module that enables users to engage in individualized live-fire training within the AutoTargets™ training system. This simplified touchscreen interface affords shooters direct control over their lane of targets. Instructors or range staff pre-load the system with games, challenges, or training curriculum for shooters to enjoy at their own pace. Results are automatically loaded into ARCS, storing data for later review or aggregating into leaderboard metrics. Optional lane-mounted cameras provide a live HD view of hits on target in fixed-mounted locations.

Outdoor & Indoor Ranges
AutoTargets do not require an outside power or air supply, making it easy to position them anywhere on a range without an expensive infrastructure. The wireless mesh network makes it easy to set units anywhere downrange and control them from behind the firing line.

An available ballistic shield holds each lift unit and CO_2 or HPA tank behind a protective barrier, enabling simple setup in a field or range without the use of a dedicated barricade system. An optional rubber block accessory creates an ideal ballistic stand.

LEARN MORE
ActionTarget.com/AutoTargets

FEATURES

▪ Lightweight, Portable Design	▪ 100% Wireless Functionality
▪ Hit-Sensing Technology	▪ Multiple Configurations
▪ Reactive Target Lifting	▪ Enhanced Software Option
▪ Safe From Splatter Or Ricochet	▪ Personal Performance Tracking

UNRIVALED EXPERIENCE

AutoTargets provide the most flexibility, portability, and ease of use versatility in the industry. Battery and air-tank operation make them easy to setup anywhere, including remote locations. AutoTargets use a patent-pending, hit-sensing target that is controlled on a wireless device. Performance, speed and accuracy are automatically scored for each shooter. Individuals or teams scores are processed without having to call the range cold in order to count, score, repair or reset targets.

Competitions

Multi-target speed shooting is the fastest growing shooting sport. Create challenging stages on the range with AutoTargets. The Android™ app or enterprise AutoTargets RangeControl™ software measures speed and shot placement within multiple target zones and with timed accuracy within a hundredth of a second. Scores are automatically recorded, saving time and reducing staffing requirements.

Training Classes

Immediate feedback is the key to rapid improvement. AutoTargets fall when you hit them, encouraging development of good muscle memory. Easily track student progress through software. AutoTargets enhance modern training and skill building by adding measurable metrics to instructor-created courses of fire and drills. Create custom tactical training environments to bring local law enforcement into the range.

Special Events

Give customers an experience worthy of their social media. Temporarily convert existing shooting lanes to interactive AutoTargets with ease for private events or special activities. Running the system is simple and only requires a single staff member.

VIP Experience

Give the best customers an experience they can't get anywhere else. AutoTargets can be a permanent part of the range, creating a shooting gallery feel where members can enjoy their new and favorite firearms while putting them through the paces. AutoTargets controls are intuitive and simple enough that anyone can use them with a few minutes of training.

AUTOTARGETS™ TARGET TYPES
ENHANCED DYNAMIC TRAINING

AutoTargets supports multiple hit-detection methods. When a target is struck, each unit sends a digital signal to the control software, which displays draw speed, split times, and hit location. With zone detection targets, AutoTargets significantly increases available training time by eliminating downrange walks for resets, taping, and repairs—ideal for large groups and long-distance drills.

E-Type

F-Type
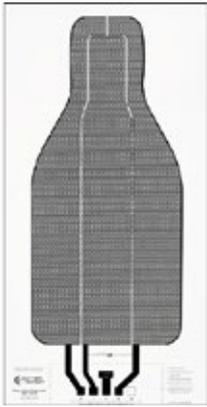

HitSync™ Target
Action Target's proprietary HitSync Target provides multi-zone hit detection for projectiles from .22lr - .50 BMG at any distance and can last up to 1,000 rounds. The conductive matrix on each target recognizes hits from metallic projectiles, rising and falling based on programmed requirements.
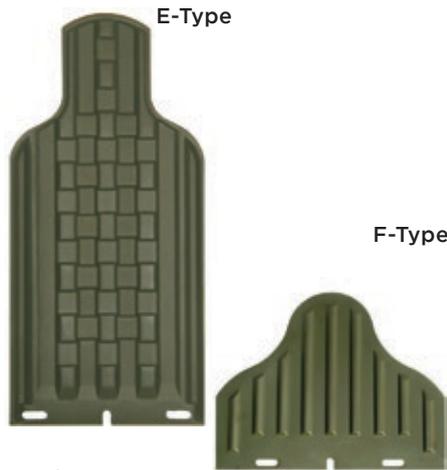

Kinetic E/F Type Targets
A military-style target that detects shots anywhere on the single-zone target. It also has advanced signal processing that eliminates false hits from any distance in any weather condition. Targets offer reliable hit detection for thousands of rounds. *Kinetic E/F targets require a kinetic lift unit and can not be used with the hit-sync target standard lifter.*

AUTOTARGETS™ ACCESSORIES

Tablets
Provisioned 10.1" tablets with IP68 outdoor rating and mil-spec compliance.

Ballistic Shield
16x16 - 3/8 inch AR500 steel plate clad with 1-inch thick rubber. A tool-free design, the shield protects the unit and pneumatics.

Air Bottles
CO_2 or HPA bottles are shipped empty. Filled bottles provide hundreds of lift cycles.

LCI Camera
Downrange HD camera for live target viewing. Requires ARCS.

Wi-Fi Range Extender
Portable antenna that increases the outdoor range of AutoTargets up to 1,000 yards.

Mounting Systems
Install AutoTargets to walls, bullet traps, furniture, or any other downrange object.

SHOOTING STALLS
Customize your range

CITADEL™ STALL
MODERN SOPHISTICATION FOR YOUR RANGE

The Citadel leads the industry's shooting stalls lineup with options for customization, a deeper footprint, and full range integration.

Customization
The Citadel can be customized to meet the specific branding needs of your business and range facility. Choose from a variety of color and finish options, stall wall materials, stall accessories, and an optional lit lane number via a projection system. Non-porous materials prevent accumulation of lead, oil, and carbon for easy cleanup.

Stall Lighting
Optional stall lighting properly illuminates the shooter's table and booth while reducing shadows and glare. The Citadel has floor-to-ceiling customizable LED lighting that accents its modern design, that will enhance the look and feel of any range to a high level of modern sophistication.

Muzzle Blast Barrier
An integrated muzzle blast barrier improves the shooter's comfort by blocking muzzle blasts from adjacent lanes and reduce noise reverberation creating an enhanced shooting space.

Acoustic Treatment
The standard PEPP-lined ceiling and muzzle blast barrier reduce noise reverberation. Rubber panels may also be used for enhanced life and easy cleanup.

Stall Tables
In addition to the standard fixed table (with an optional shelf), all stalls are compatible with a swing-up table, rifle table, tactical cart, and electric lift table. These options improve functionality and ease of downrange access.

Stall Footprint
Shooters will appreciate a deep footprint, which is perfect for those who desire the fortitude of privacy while they shoot. At the same time, sizable ballistic glass panels provide a high level of visibility for optimal safety standards on the range.

Citadel™

AMERICAN SERIES™ STALL

UNRIVALED CUSTOMIZATION

The American Series stall comes in three standard variations, but virtually every component, color, and material can be customized for your range.

Customization
Customize American Series stalls to carry your brand from the lobby to the firing line, reinforcing your identity where customers spend the most time. Choose tile, rugged steel, or ABS skins that resist lead, oil, and carbon buildup for faster wipe-downs, lower labor, and a cleaner-looking line between sessions.

Stall Lighting
Choose optional overhead stall lighting for clearer visibility with fewer shadows and less glare. Pair with Genesis retrievers dock lighting for simulated scenario light options. Add floor-level LED accents along the stall to create a clean, modern look.

Muzzle Blast Barrier
An integrated muzzle blast barrier improves the shooter's comfort by blocking muzzle blasts from adjacent lanes and reduce noise reverberation creating an enhanced shooting space.

Acoustic Treatment
The standard PEPP-lined ceiling and muzzle blast barrier reduce noise reverberation. Rubber panels may also be used for enhanced life and easy cleanup.

Stall Tables
In addition to the standard fixed table (with an optional shelf), all stalls are compatible with a swing-up table, rifle table, tactical cart, and electric lift table. These options improve functionality and ease of downrange access.

Range Branding
A back-lit stainless steel logo plate displays the lane number and can be customized with your range logo.

Stall Footprint
American Series' deep stall footprint gives shooters more room to stage gear, move naturally, and maintain safe muzzle discipline, while also providing a greater sense of privacy and safety.

FEATURES

• Customizable Colors, Materials, And Branding	• Integrated Acoustic Material
• Personalized Lane Numbers	• Overhead Stall Lighting
• Integrated Muzzle Blast Barrier	• Independent Ballistic Testing

SENTRY™ SERIES STALL
ENHANCED PRIVACY AND FUNCTIONALITY

The Sentry stall comes in a standard and deluxe configuration. The Sentry offers ranges a more economical single panel option while the Sentry Deluxe offers customers a unique shooting experience with a deeper stall, doubling ballistic protection. Set your range apart with this private shooting stall and its custom accessory and color options.

Sentry™

Brass Deflector
An optional brass deflector blocks brass from traveling into adjacent lanes, creating a safe environment for customers.

Muzzle Blast Barrier
Adding a muzzle blast barrier to the front of the stall blocks muzzle blasts from adjacent lanes, drastically improving the shooter's comfort.

Stall Lighting
Sentry gives you lighting flexibility: use back overhead or ceiling fixtures for stall illumination. Pair with Genesis retrievers dock lighting for simulated scenario light options. Add optional LED-lit glass panels to further elevate your range's look.

Stall Tables
In addition to the standard fixed table (with an optional shelf), all stalls are compatible with a swing-up table, rifle table, tactical cart, and electric lift table. These options improve functionality and ease of downrange access.

Ballistic Panels
Customize your stalls with ballistic glass for improved visibility or solid ballistic steel core panels for optimal privacy. Rugged ABS skin resists brass impacts for long life and low maintenance. Steel core panels are available with a rubber lining or a wood and ABS plastic lining.

Sentry Prestige™ Customization
Sentry Prestige turns each lane into a premium, on-brand experience, without redesigning your range. Customize the Sentry frame with your choice of tiles and finishes, branded graphics, and PEPP/rubber sound abatement to match your vision and budget.

DEFENDER™ STALL
THE STANDARD IN MODULAR CUSTOMIZATION

The Defender stall is the most modular shooting stall on the market. Interchangeable ballistic panels make servicing the stall easy and cost-effective. Custom color options and attachable accessories give your range a unique look and feel.

Brass Deflector
A standard brass deflector blocks brass from traveling into adjacent lanes, creating a safe environment for customers

Muzzle Blast Barrier
Adding a muzzle blast barrier to the front of the stall blocks muzzle blasts from adjacent lanes, drastically improving the shooter's comfort.

ABS Frame Skin
A textured layer of ABS plastic can be added to the stall column for extended protection of the stall finish.

Stall Lighting
Choose back overhead or ceiling lighting for even booth illumination. Pair with Genesis retrievers dock lighting for simulated scenario light options. Add LED accent edge lighting in the optional glass side panel for a clean, premium glow.

Stall Tables
In addition to the standard fixed table (with an optional shelf), all stalls are compatible with a swing-up table, rifle table, tactical cart, and electric lift table. These options improve functionality and ease of downrange access.

Ballistic Panels
Customize your stalls with ballistic glass for improved visibility or solid ballistic steel core panels for optimal privacy. Rugged ABS skin resists brass impacts for long life and low maintenance. Steel core panels are available with a rubber lining or a wood and ABS plastic lining.

Custom Design Glass
Take your stall to the next level with our custom glass design process. This process allows you to prominently display graphics or your logo to create a unique feel during the shooting experience.

GUARDSMAN™ STALL
ESSENTIAL PROTECTION

The Guardsman shooting stall features a rugged yet simple design that retains the industry-leading ballistic standards to which Action Target proudly holds itself.

Ballistic Panels
A rugged ABS skin resists brass impacts for long life and low maintenance, with fixed solid ballistic steel core panels for optimal privacy. Steel core panels are available with a rubber lining or a wood and ABS plastic lining.

Control Panel
Control panels can be installed at standard or ADA-compliant heights.

Stainless Steel Trim
A stainless steel trim protects all edges of the stall from damage.

Easy Install
The Guardsman stall's minimalistic design reduces time and installation costs.

Economical
The simplified design and feature set of the Guardsman stall make it a great economical solution for ranges.

Stall Tables
In addition to the standard fixed table (with an optional shelf), all stalls are compatible with a swing-up table, rifle table, tactical cart, and electric lift table. These options improve functionality and ease of downrange access.

STALL CUSTOMIZATION

CUSTOMIZED TO YOUR STYLE

Your range is more than a collection of lanes and targets, it's where precision meets purpose. Whether you're building for a public facility, a private range, or a mission-driven training environment, every detail matters. With Action Target, you gain more than equipment, you gain a partner dedicated to bringing your vision to life. From design consultation and custom layouts to advanced target systems and safety solutions, we tailor every element to your goals.

Action Target offers the most versatile shooting stall selection, designed to fit any shooting range layout or size. Work with our team to bring your vision to life. Tailoring each design with a wide array of materials, colors, and options to match your range's unique style and needs to create the ideal shooting environment.

WANT SOMETHING TRULY UNIQUE?

Consult with a range designer today!
ActionTarget.com/Contact-Us

American Series™

A floor-to-ceiling deep footprint design ensures ultimate privacy, while customizable materials, acoustic treatments, and integrated muzzle blast barrier maximize comfort. The durable, low-maintenance materials make it a perfect blend of unmatched style, functionality, and safety.

FEATURES

- Customizable Colors And Materials
- Customizable Branding And Signage
- Additional Customizations Available Upon Request

Sentry™

Enhanced privacy, functionality options, and customization for an exceptional range experience. Available in standard or deluxe footprint configurations, the Sentry Shooting Stall is designed to elevate your range, setting it apart with excellent blend of elegance and sophistication.

Defender™

For range owners who demand unparalleled flexibility, resolute safety, and exceptional style. This modern design, with extensive customization options, and cutting-edge ballistic protection make it a must-have for shooting ranges looking to deliver a premium experience.
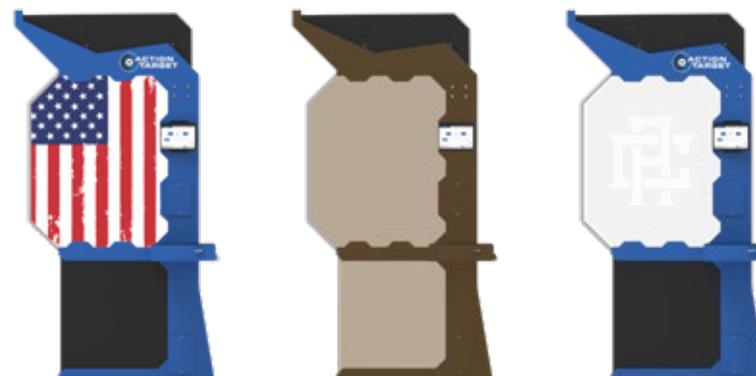

SHOOTING STALL UPGRADES
CUSTOMIZE THE SHOOTER'S EXPERIENCE

Fixed Table
Provides a durable, easy-clean work surface for safe loading and gear staging.

Rifle Table
Wider-footprint rifle table: accommodates larger firearms; supports bipod, sandbag, or lead-sled use

Swing-Up Table
Swings up to the right stall wall and rests vertically for easy downrange access, maintenance, and tactical drills.

Tactical Cart
Set on casters to detach from stall and roll downrange for tactical training. A storage shelf is included.

Electric Lift Table
Allows quick, electric push-button height changes to accommodate shooters, positions, and adaptive training needs. *For standard or rifle table top widths*

Table Shelf
Adds convenient surface space for gear, ammunition, or training materials. *Not compatible with the Swing-up Table.*

Adjustable Brass Deflector
Ensures effective blocking of any spent brass from entering adjacent stalls, fostering a safe environment.

Muzzle Barrier
Blocks muzzle blasts from adjacent lanes, improving the shooter's comfort.

Rifle Rack
Safely stores rifles with the barrel pointing downrange.

Adjustable Pivot Barricade
Adapts to any training scenario and swings out of the way as needed.

*Not all accessories and options are available for all stall options. All tables are available in 30″, 36″, 42″, and 54″ widths.

BULLET TRAPS
Engineered to perfection

TOTAL CONTAINMENT TRAP™

SUPERIOR BULLET COLLECTION

The Total Containment Trap offers unparalleled efficiency and reliability for collecting bullets while providing a tactical close-range and cross-lane shooting environment. The patented design utilizes a number of features that not only capture lead fragments and dust, but also simplify the process of recycling lead.

Funnel Plates
Precisely engineered ballistic steel deflects bullets into the Vortex™ chamber with minimal splatter. Indoor and outdoor options are available.

Vortex™ Deceleration Chamber
Rounds pass through the mouth of the trap and into the Vortex chamber. The bullets decelerate as they spin along the inside wall of the chamber.

Bullet Collection System
Once decelerated, rounds fall into the Bullet Collection System for easy recycling. Options include Basic 3 (3.5-gallon canisters) or Deluxe 20 (rolling 20-gallon drums). Choose the setup that fits your range volume and maintenance plan.

Dust Collection Unit
Using negative pressure, the Dust Collection Unit draws lead dust from the trap and deposits it into a containment system for easy recycling.

Low Maintenance
The TCT is modular, which means it can be maintained and serviced with little to no downtime. The system also does not utilize water for cleanup or rubber for bullet containment.

- Automated Bullet Collection
- Various Configurations

BULLET COLLECTION SYSTEMS

BCS Deluxe 20

The BCS Deluxe 20 collects bullets in 20-gallon drums for recycling. The BCS Deluxe 20 is compatible with the 3x5 Total Containment Trap configuration.

Easy Fill Level Check
The integrated barrel lid includes a sight window for quick and easy identification of drum fill level.

Straightforward Drum Removal
The drum is sealed to the discharge hopper with a lid clamp that has a quick disconnect toggle clamp. Each drum has a heavy-duty reusable dolly for easy drum maneuvering during change-out.

Easy Drum Transfer
We offer three types of equipment for transferring full drums to a pallet: 1) barrel hawk, which functions like a pneumatic hand cart; 2) crane, which uses a chain winch to lift and remove drums; and 3) fork lift mount, which mounts to a forklift.

Reduces Service Frequency
The large drum capacity provides for longer service intervals.

BCS Basic 3

The Vortex is also available with an economical BCS Basic 3. This system is comprised of 3.5-gallon canisters that attach to the underside of the chamber to collect bullet fragments.

BCS VOLUME COMPARISON

Based on a 10-lane range and 3 million rounds collected per year.

RUBBER BERM TRAP

NOT ALL RUBBER BERM TRAPS ARE BUILT ALIKE

Action Target's Rubber Berm Trap has numerous attributes that set it apart from the competition. For example, the trap is engineered with a uniquely designed galvanized steel frame that holds rubber in place to safely capture rounds. The rubber can also be treated with a flame-resistant formula to provide maximum fire protection.

Rubber Granules
Action Target's styrene-butadiene rubber granules are available in a variety of sizes and grade options to fit the needs of any range.

Fire Treatment
Action Target provides optional Flame Lock™ flame-resistant treatment. This gives rubber granules an ASTM-E84 and ASTM-E108-11 Class A rating, which is the industry's best fire rating.

Self-Supporting Frame
The Rubber Berm Trap is the safest rubber trap available. The self-supporting berm frame is designed to IBC standards.

Patented Fin Design
The Rubber Berm Trap's patented fin design keeps the rubber at a depth that is safe for shooters and reduces trap maintenance.

Sidewall Protection
Customers may opt for AR steel sidewalls to prevent bullets from damaging the range walls.

Integrated Baffles
Optional overhead baffles are available for additional protection of the building structure. Baffles can also be positioned as a hopper feeder for granule distribution.

SHOTGUN RANGE
Smarter Clay Shooting

SHOTGUN RANGE
THE NEXT GENERATION OF CLAY SPORTS

Action Target Shotgun Ranges turn clay sports into a repeatable, high-throughput attraction. Scalable layouts and clear on-screen guidance speed onboarding, while automated controls and large-capacity carousels cut resets, labor, and downtime. A flexible footprint and configurable software fit any space and audience to maximize throughput and revenue.

High-Capacity Shooting Suites
Supports up to four shooters simultaneously per suite, maximizing throughput and revenue potential. Design the number of suites around your space and audience, then scale as demand grows. Clear prompts and pacing tools keep groups moving without creating bottlenecks for staff.

Scalable Designs
Select the right mix of throwers to deliver realistic flight paths and shot variety. Include rabbit throwers that roll along the ground and then pop up—forcing quick transitions and reaction shots. Support up to 48 throwers and adapts to various range sizes, with software that adjusts to specific configurations.

Cutting-Edge Technology
High shooter capacity with advanced features, such as digital scoring, real-time thrower feedback, suite sequence automation, no-bird, pause, realistic target flights, and countdowns for smooth shooting without delays.

Gamified Entertainment
Deliver a memorable, repeat-worthy experience. The system's variety of game modes, glow clay low-light sessions, and intuitive digital interface make it approachable for beginners, families, and seasoned shooters alike.

Multiple Game Modes
Includes simulated trap, skeet, five-stand, sporting clays, and self-select courses, with up to eight custom pre-programmed courses for varied experiences.

Thrower Configuration
Sophisticated software revolutionizes how throwers are selected and queued for optimal performance. The smart controls automate complex processes behind the scenes, ensuring precise thrower activation, clear guidance for shooters, and effortless adaptability to changing environments.

Shooter Ready!!

SHOTGUN RANGE TOPSHOT

REAL SHOTS. REAL VARIETY.

The TopShot Clayhouse system is a unified, suite-based system that orchestrates throwers, timing, and scoring so sessions run smoothly with minimal staff intervention. Shooters get real-time guidance and range owners get predictable flow and repeatable results.

Software and Controls
Experience the pinnacle of shotgun range innovation with TopShot Clayhouse, that seamlessly blends cutting-edge technology with user-friendly controls. Designed for effortless operation and immersive engagement, while enhancing safety, efficiency, and enjoyment for operators, shooters, and spectators alike.

Familiar Disciplines
Offer familiar disciplines and custom courses that match your clientele—from first-timers to enthusiasts. Randomization, true pairs, and difficulty presets keep sessions fresh and repeatable.

- Simulated trap and skeet experiences
- Five-stand with target variation
- Simulated sporting clays for advanced challenges

Custom Courses and Randomization
Empower operators and shooters to create dynamic, personalized sessions to empower leagues and other events, ensuring every visit is engaging, challenging, and effective.

Progression and Repeatability
Transform your shotgun training into an addictive, rewarding journey with TopShot Clayhouse. Key features foster continuous improvement, friendly competition, and long-term engagement, turning one-time visits into lifelong habits.

Electronic Interface
User-friendly digital controls in each suite display a countdown timer, thrower locations, and a clay house diagram for intuitive navigation.

SAFETY BAFFLES
Protect your entire building

SHIELDPRO™ CEILING BAFFLES

COVERAGE YOU CAN COUNT ON

ShieldPro™ Ceiling Baffles provide superior ballistic containment and acoustic control, ensuring maximum range safety while protecting overhead structures. Featuring a patent-pending design, they capture errant rounds, reduce ricochets, and direct spent material downward for easy cleanup. Built from durable AR500 steel, they support fixed firing line or tactical configurations with modular installation for easy customization. ShieldPro™ enhances shooter safety, reduces noise, and improves range efficiency.

Enhanced Safety & Ballistic Protection
Prevents errant rounds from exiting the range and mitigates ricochets and splatter, ensuring a safer shooting environment; while also shielding lighting, electrical systems, ventilation, and ceiling structures from bullet damage.

Modular & Durable Design
Built from AR500 ballistic steel, that provides extended performance under continuous live-fire use the ShieldPro baffles are easily installed, removed, or reconfigured to fit any range layout, including fixed firing lines and tactical training setups

Effortless Cleanup & Maintenance
Featuring a vertical Z-furring design to secure acoustical materials, these baffles effectively redirect and contain errant rounds by utilizing an integrated air gap, which mitigates ricochets and splatter, directing spent material downrange for safe, effortless cleanup and maintenance.

Superior Acoustic Control
Create a more comfortable range experience, reducing noise levels with multiple sound-dampening fascia options, Sound fascia material with steel Z-furring configuration providing noise reduction coefficient up to 0.95 NRC depending on range design:

- Porous Expanded Polypropylene Panels (PEPP)
- Acoustic Ceiling Tile/Panel
- Wood Fiber Acoustic Panels
- SureStopTM Rubber Panels (Flat and Acoustic)

  SureStop Rubber fascia option can be directly applied to the face of the steel baffle plate without vertical z-furring configuration

Configuration Options
We offer two ShieldPro™ ceiling baffle types based on your range's needs:

- ShieldPro Lite mounts directly to your building structure for a streamlined install on standard ranges.
- ShieldPro Plus uses wide-span panels to extend coverage for large tactical bays and expansive layouts.

FEATURES

Engineered Deflection Angles	AR500 Ballistic Protection	Fixed Firing Line or Tactical Configuration
Modular & Customizable	1/4″, 3/8″, or 1/2″ Steel Thickness Options	Outdoor Configuration Applications
Prevents & Contains Splatter	Vertical Z-Furring Design	No Field Welding Required
Protects Ceiling Mounted Equipment	Variety of Acoustic & Fascia Options	Exceeds UFC-4-179-02 Requirements

BAFFLE FASCIA OPTIONS

Both ceiling and wall baffle systems can be customized with a variety of fascia options that provide sound abatement, make the range more comfortable for users, and give it a clean, finished look. These fascia options are available in a number of thicknesses and colors.

Acoustic Ceiling Tile
Low cost with high sound reduction.

PEPP
Attractive finish, medium to high sound reduction.

Wood Wool Panels
Medium to high sound reduction.

Beveled PEPP
Available in different thicknesses and color options.

SureStop™ Rubber

SureStop rubber blocks and panels encapsulate rounds, eliminate splatter, and prevent bullet ricochets in both indoor and outdoor live-fire applications. SureStop rubber is comprised of a proprietary blend of carefully selected media and specialty binders. Its optimal ballistic and acoustic properties have been rigorously tested and verified by external organizations.

Blocks (24"x12"x9")
Ideal for knee walls, rubber bullet traps, and shoot houses.

Standard Flat
Designed for optimal ballistic longevity.

Acoustic
Designed to drastically reduce sound reverberation.

Panels (24"x24"x2")
Ideal for combat walls, standard walls, ceiling baffles, and shoot houses.

Standard Flat Edge
Designed for optimal ballistic longevity.

Edge Lock™
Overlapping edges eliminate the possibility of an unprotected seam.

Acoustic
Designed to drastically reduce sound reverberation.

Flame Lock™

SureStop products may be treated with Action Target's proprietary Flame Lock intumescent paint for an ASTM-E84 and ASTEM-E108 Class A fire rating. SureStop is manufactured to ensure maximum adhesion of Flame Lock for safety and durability under extreme indoor and outdoor conditions.

COMBATSHIELD™ WALL BAFFLES
KEEP ERRANT ROUNDS SAFELY CONTAINED

CombatShield™ Tactical Wall System from Action Target enables safe, 180-degree tactical training on modern shooting ranges. Installed along the sidewalls, this shooting range wall system captures rounds, resulting in better shooter protection and stronger facility integrity for commercial ranges that run tactical classes and high-tempo training.

Ballistic Steel Baffles
Engineered steel baffles withstand thousands of handgun and rifle hits, keeping rounds contained inside the shooting range. ATI Class 1 (Handgun) and ATI Class 2 (Rifle) options are available.

Safe
Protects walls, lighting, and conduit from errant fire, while also controlling ricochet and splatter to keep shooters and staff safe.

Modular
Individual baffles may be replaced as necessary, keeping maintenance costs low.

Customizable
Action Target's wall baffles are compatible with various fascia options, range sizes, and ballistic ratings.

Fascia Options
Wall baffle fascia helps contain splatter and provides sound abatement for the range.

Wood Panel
A layer of wood over the baffle contains bullet splatter, keeping shooters and range staff safe.

Air Gap
A wood or steel furring within the baffle provides space for bullets to splatter.

Wall Deflectors
Wall deflectors mount ahead of the bullet trap and over wall seams to keep rounds inside the range. A two-piece, engineered profile drives errant shots safely downrange, and replaceable wear plates simplify maintenance and control costs.

Basic Wall Baffle Option
Wall baffles can be installed as ballistic steel only, without an air gap, z-furring, or wood, for training programs focused on standard downrange fire. This configuration is engineered to redirect glancing impacts downrange.

VENTILATION

Clean and efficient

VENTILATION
VITAL TO SAFETY AND COMFORT

Proper ventilation is essential to the shooter's experience and provides a safe atmosphere for employees and customers. Action Target provides 180-degree ceiling-mounted air delivery ventilation systems that exceed OSHA, EPA, and NIOSH regulations. Both purge and recirculation systems are available, as well as systems with heating and/or cooling. Ventilation systems can be installed indoors and outdoors.

SmartRange AXIS™ Control
Action Target's ventilation systems seamlessly integrate with SmartRange AXIS range control software. This software provides an intuitive digital display of the ventilation system, including real-time filter life data and remote servicing capability.

Purge System
A purge ventilation system draws air into the range, filters it, then releases cleaned air back into the atmosphere.

Recirculation System
A recirculation ventilation system filters and reuses air within the range. These systems require less energy to function because the reused air is already cooled or heated.

Laminar Diffusion
Ventilation systems introduce clean air to the range behind the shooting line. A radial diffuser ensures the air is evenly distributed.

Carbon Monoxide Monitoring
Shooting activities produce poisonous CO (carbon monoxide). In order to maintain safe levels within the range space for staff and shooter safety, a portion of the air is exhausted out to the atmosphere and fresh air is introduced back into the range.

Air Flow
Ventilation systems create negative air pressure to draw hazardous dust-filled air away from the shooter and toward the bullet trap. From there, the air enters a filtration system for a final cleaning process.

Filtration
Ventilation systems filter and collect contaminated air, meeting OSHA, EPA, and NIOSH requirements.

Climate Control
Ventilation systems adapt to changing environmental conditions to maintain required air speed and pressure conditions.

RANGE SECURITY
ADVANCED MONITORING TECHNOLOGY

Action Target Security Powered by Fedora, a leader in security services, integrates cutting-edge camera technology, security equipment, highly-trained security professionals, advanced monitoring centers, and intuitive user access management tools to provide the industry's best security solution.

Prevention
Action Target's use of advanced technology ensures that only true threats result in emergency calls. As a result, there are less than 1% false alarms, versus the industry standard of 90%. This decreases costs and improves response times.

Video Protection
External and internal HD cameras with advanced video analytics provide the most reliable protection for your range. These systems are able to recognize a number of perimeter breaches including entering/exiting, object removal/abandonment, loitering, and system compromises.

Two-Way Audio
A perimeter solution that provides a full duplex audio system, giving the monitoring operator the ability to communicate with and warn a threat while calling law enforcement. This prevents break-ins and property damage from occurring in the first place.

Full Redundancy
Uninterrupted power supply keeps cameras on for 4+ hours and a cellular gateway provides emergency backhaul.

Cloud-Based Management
Secure each room or door with key card, biometric, or passcode access systems and manage user access through an easy-to-use cloud-based network. User privileges may be adjusted/revoked at any time. Stay connected and view live video feed from anywhere via mobile device or PC.

In-Lane Monitoring
Full 1080P HD cameras in each lane allow visibility for the range safety officers, range owner, and front desk.

Network Video Recording
Network video recording systems provide 24-hour recording with 40+ days of storage capacity. A video monitoring system allows the range to monitor its activity and is compatible with PC and mobile devices (iOS and Android).

Fusion Monitoring Center
All security equipment is monitored and processed 24/7 by professionally trained dispatchers at Fedora's UL, CSAA, and ESA certified Fusion Monitoring Center in Charlotte, North Carolina.

- Two-Way Audio
- 24/7 Monitoring
- Access Control

RANGE LIGHTING
Properly designed, perfectly comfortable

Range Lighting   82

RANGE LIGHTING

LIGHTING THAT SETS RANGES APART

Lighting makes all the difference to the atmosphere and enjoyment of a shooting range. Action Target has worked with lighting experts, range designers, and engineers to create a perfect lighting solution that includes adjustable brightness, ideal temperature, and optimal arrangement.

Staging Area Lighting
Provides sufficient lighting for range safety officers and shooters to stage their firearms while avoiding eye strain.

Stall Lighting
Provides glare-free and strain-free lighting at the table without casting shadows.

Downrange Lighting
Properly placed lighting provides continuous illumination in the entire range. Track and baffle placement are taken into account to reduce shadows that distract shooters and create a dingy environment.

Control Systems
Advanced lighting controls allow ranges to create unique settings throughout the range. Individual fixtures or zones can be turned on, off, or dimmed.

▪ Downrange Lighting	▪ Police Strobes

RANGE TRAINING
Get your staff range ready

RANGE TRAINING

Action Target and Team One Network have partnered to create newly designed courses to provide certification for range masters, firearms instructors, shoot house instructors and range safety officers. These updated courses will educate attendees about new technology in modern shooting ranges, target design, and training tactics.

COURSE OFFERINGS

Range Master
Typically the most experienced firearms instructor, the range master is in charge of the range. This course further develops the firearms instructor's knowledge by expanding their skills in the safe and efficient management of a firearms range and training program.

Chief Range Safety Officer
Chief range safety officers have the knowledge, skills, and attitude essential to organizing, conducting, and supervising safe shooting activities and range operations. Successful completion of this course allows individuals to educate, train, and certify range safety officers. This course requires the NRA Range Safety Officer certification as a prerequisite.

Range Safety Officer
The NRA Range Safety Officer Program was developed in response to the demand for a nationally recognized range safety officer certification. Range safety officers are people who possess the knowledge, skills, and attitude essential to organizing, conducting, and supervising safe shooting activities and range operations.

Defensive Pistol for the Concealed Carry
This course is designed to merge combative handgun techniques with everyday carry and concealment of a personal handgun. The course combines classroom and range time to give the student a solid understanding of what is required to deploy the combative handgun from a covering garment.

Dynamic Use of Target Systems
Law enforcement communities know that realistic training is the key to giving students the experience necessary to prevail in stressful situations. This course provides a series of dynamic training exercises that will help you improve your live fire training program. It also includes some of our methods for using a variety of targets to create a building block approach to realistic training during live-fire exercises.

Shoot House Instructor
Shoot house training provides officers with the opportunity to hone their shooting skills under realistic, high-stress conditions. This course offers instructors all the tools necessary to build a shoot house program and improve their fellow officers' shooting skills.

Reactive Steel Target Instructor Workshop
The primary advantage of steel targets is that every accurate shot will give you instant feedback from the target's reaction and satisfying "clang." While steel targets are a highly effective training tool, there are safety considerations that need to be addressed. You are required to know what is behind the target and be aware of the bullet splatter area. Improper or inconsistent bullet splatter poses a significant risk. This course teaches you how to use steel targets safely as well as the most effective ways to implement them into your firearms training.

RANGE SERVICES
Protect your investment

PARTS AND MAINTENANCE

LET OUR EXPERTS KEEP YOUR RANGE RUNNING

Our job is not finished just because your range project is complete. Customized to your specific range needs, Action Target works with you to build a plan that determines the appropriate number of annual maintenance visits your facility requires. These visits include a number of specialized services to keep your range running at peak condition.

Maintenance
We provide resources to help you maintain your range. From maintenance schedules to operation and maintenance manuals, we ensure you are prepared to properly care for your equipment.

Protect Your Warranty
Performing all required maintenance is key to keeping your equipment under warranty. A regularly scheduled maintenance plan with trained Action Target technicians is the best way to ensure this happens.

Save Time
Many range operators simply don't have the manpower, expertise, or time to keep their equipment properly maintained. When lack of maintenance leads to equipment failure, critical operating time is lost.

Parts
Action Target will help keep your range running at peak condition by helping your source the correct ATI parts for your range equipment when needed. Having an expert working with you can make the difference in how quickly a solution will be identified. When you have equipment failure, your dedicated territory manager will work with you to get things operational again.

Range Cleaning
With staff and client safety as our top priority, we provide cleaning services to help you maintain a safe and sanitary range.

General
- HEPA vacuum:
  - Ventilation vents.
  - Floor and walls.
  - Ceiling and wall baffles.
  - Target retriever tracks.
  - Shooting stall soft surfaces.

- Maintain and clean your HEPA vacuum, including filter changes as needed.

- Wet wipe shooting stall hard surfaces.

- Clean shooting stall glass.

- Remove, replace, and properly dispose of air filters

Steel Bullet Traps
- Gather and dispose of bullet fragments, bullet jacket fragments, and other debris.

- HEPA vacuum:
  - Exposed surfaces.
  - The area behind the trap.
  - Remove lead ingots and other accumulation

Staff Training
When our technicians are on-site, they are available to provide ongoing equipment training for your staff.

Service Visit Discounts
Maximize your maintenance value by signing up for a maintenance package. We currently have three discount tiers based on the number of visits your range will utilize throughout the year. Don't wait until something breaks down, keep your range running at peak condition.

Gold Plan- 4 Annual Visits ★★★★
Silver Plan- 3 Annual Visits ★★★
Bronze Plan- 2 Annual Visits ★★

LEARN MORE
Customized maintenance plans are available for any range. For more information or to schedule a service, contact us at **801.377.8033 (Option 2)** or **services@actiontarget.com**.

METALS RECYCLING PROGRAM
BOOST YOUR SPENDING POWER

Action Target converts your spent brass and lead into cash or credits. Use credits to purchase store products, range equipment, or range services and receive an extra 10% bonus.

Metals Recycling
Recycling your metals with Action Target is easy and efficient. Simply contact Action Target to schedule a pickup, at which time your London Metals Exchange (LME) spot pricing will be locked in.

Lead and brass pricing is listed live at LME.com, the global center for industrial metals trading. We currently pay a competitive percentage of the LME spot price for metals.

Fast and Convenient Pickup
- The minimum pickup weight for the best price is only 4,000 lbs with no maximum limits.
- The maximum pallet weight is 3,000 lbs for lift gate service or 4,000 lbs for forklift.

Simple Brass and Lead Packaging
We'll work with you to supply and customize a compli-mentary packaging system that best fits your range.
- 55-gallon drums strapped to a 31" pallet with lid and ring – approx. 700 lbs. brass or 1800 lbs. lead
- 20-gallon drum liners for lead with a 31" pallet – approx. 600-700 lbs. lead

Metals Credit Program
Action Target is committed to helping our range operators run their ranges as efficiently as possible by eliminating the guesswork. This essentially guarantees your pricing; it's always visible and we can never reduce your price percentage throughout the life of our agreement.

Best in Class Payment Structure and Loyalty Bonus
We maximize your profit by eliminating the middleman and locking in your price when we pick up your metals. To capitalize on your value, you can choose one of two options for your metal's payout.
- **Check to the Customer:** Get a check back for the amount you recycled.

ATI Store Credit
Get more buying power with ATI Store Credits. Use your metals credit at our store to buy products, services, range supplies, range maintenance services, or new range equipment and we'll add a 10% bonus
- For example, if you recycled $1,000 worth of metals, and utilize our credits program, you would have $1,100 to spend at the Action Target Store.
- This allows agencies and companies the ability to keep the metals value in a credit and allows them to maintain control of these funds to put back into the range.

LEARN MORE
Customized maintenance plans are available for any range. For more information or to schedule a service, contact us at **801.377.8033 (Option 2)** or **services@actiontarget.com**.

RUBBER BERM TRAP CLEANING
EFFICIENT, COMPREHENSIVE, AND CONVENIENT

Action Target now partners with MT2, the largest nationwide professional firing range lead reclamation contractor, to deliver top-tier rubber berm trap cleaning services. Our collaboration ensures your range stays safe, compliant, and operational with professional lead reclamation and rubber trap upkeep. Trust our combined 50+ years of experience to maximize your investment and maintain a pristine shooting environment.

Rubber Berm Reclamation
The Rubber Berm Trap Reclamation Service provides comprehensive, safe, and cost-effective solutions for indoor shooting ranges utilizing granular rubber bullet traps. We specialize in the reclamation, recycling, and proper disposal of materials, ensuring compliance, safety, and maximum value for our clients.

Key Features of Service

Advanced HEPA Vacuuming
State-of-the-art HEPA vacuums are used to clean surfaces and areas behind traps, capturing fine particulate matter, including degraded rubber, lead dust, paper, and plastic, to maintain a safe environment.

Full Pull Bullet Removal
Get a complete bullet and bullet fragment extraction from rubber traps, ensuring no hazardous materials remain.

Recovery of "Fines"
The process captures small particulate matter, such as degraded rubber and lead dust, preventing contamination and ensuring a cleaner range.

Efficient Material Separation
It economically separate bullets and bullet fragments, maximizing the value of recyclable materials like lead, brass, and copper.

Safe and Compliant Material Handling
Ensuring the safe removal, transportation, and offsite recycling of recovered range materials to the most cost-effective, licensed recyclers. Full documentation of recycling processes for county and regulatory compliance is provided with each service.

Why Choose Us?
This service delivers unmatched value through industry-leading reclamation techniques, environmentally responsible recycling, and the highest financial returns for your recovered materials. With a focus on safety, compliance, and efficiency, we help indoor shooting ranges maintain clean, safe, and profitable operations.

LEARN MORE
Customized maintenance plans are available for any range. For more information or to schedule a service, contact us at 801.377.8033 (Option 2) or services@actiontarget.com.

RANGE WASTE DISPOSAL PROGRAM

MANAGING BRASS, LEAD, AND HAZARDOUS WASTE PROPERLY

Range bi-products include recyclable hazardous materials such as collected lead, lead dust, brass, and non-recyclable waste such as used PPE and contaminated filters. Ranges are required to properly recycle or dispose of these bi-products. Action Target can take care of this for you and will provide detailed documentation of our processes for proof of compliance. All you have to do is schedule a pickup and choose to receive the value of your recycled metals in the form of a check or credit for Action Target products and services.

Range Waste Disposal

Action Target makes it easy to dispose of your contaminated range waste such as lead-contaminated filters and PPE. Action Target will coordinate pick up and disposal of HVAC and DCU filters for members of our Filter Disposal Program.

Compliant and Reliable Disposal

Action Target uses approved disposal procedures. Hazardous waste collection and disposal are strictly governed through EPA and DOT regulations.

- We provide proper disposal documentation, protecting you from potential fines.
- RCRA (Resource Conservation and Recovery Act) approved.
- OSHA and EPA compliant

LEARN MORE

Customized maintenance plans are available for any range. For more information or to schedule a service, contact us at **801.377.8033 (Option 2)** or **services@actiontarget.com**.

RANGE SUPPLIES
EVERYTHING FOR YOUR RANGE

Action Target designs and provides targets, gear, and supplies for government, law enforcement, shooting ranges, gun clubs, and shooting enthusiasts everywhere. With an unrivaled selection, we offer more target designs than anyone in the industry to keep your retail area stocked and your range clean, safe, and ready to operate. From range safety products and cleaning supplies to paper, cardboard, and steel targets, we have everything you need to make your range or firearms training program a success.

Paper Targets
An unrivaled selection of paper target designs in the industry.

Cardboard Targets
Competition-ready, perfect for IPSC, IDPA, NRA, and USPSA training and events.

Plastic & Rubber Targets
Military, 3D anatomy, weather-resistant qualification targets, and more.

Custom Targets
Design targets that align perfectly with your training or recreational needs.

Target Stands
Static and dynamic target systems for any kind of training, anywhere you train.

Steel Targets
Specifically designed to filter lead and high loading conditions found in indoor firing range applications.

Shooting Supplies
Everything you need to be prepared to perform when the pressure is on.

Range Management
Maintain an exceptional shooting experience where safety and excellence come first.
